

## **Mayoral Candidate Valerie Chadbourn – Oct 8, 2010**

Dear Civic League

As your Mayoral Candidate for the City of North Bay I feel that a democracy needs truth and has to be all inclusive to perform at an optimum level for the citizens it serves.

I have a clear vision for sustainable economic, environmental and social growth that will involve every interested citizen to achieve success. People are our greatest resource and if there is a controversy, freedom of speech will prevail in my term of government.

As your Mayor my mandate will be to give the directive and leadership to keep the jobs we have and to create new jobs by growing an economic foundation in the regional/ local food industry to meet the citizen demand for jobs and food in the future.

This much needed industry has to be built with special consideration to our natural diversity, to protect the integrity of our environment so again it will take special consideration and knowledge for economic growth to occur in a sustainable manner.

My mandate also includes local tourism and green space infrastructure that will be organized in a step by step process of volunteer public information gathering, processing and implementation.

This information gathered by local volunteers will include first public ideas on how to enhance green spaces and then will include logistics such as historical/commuter/recreational/tourism data that will be added to provide a complete plan for bike path improvements.

These over all plans will result into an effective and efficient commuters/recreational/tourism infrastructure system that will be easy on the tax dollars and good for all of the residence and for our local economy.

All of the initiatives above are currently in the early stages of organization and will be ready for further planning, at little cost to the taxpayer when I reach office. People are ready for change and have already stepped up voluntarily to make these exciting initiatives happen.

When elected all of the economic initiatives in my platform will be ready to implement at little cost to the tax payer after our obligation to our current municipal government agenda, over the next year or so, is completed.

We have a clear vision for future economic, environmental and social enhancement; however I need your vote, your opinions and a good council to proceed.

Thank you for your interest and for the survey.

Sincerely,  
Valerie Chadbourne  
Mayoral Candidate
