

NORTH BAY

THE BEST IT COULD BE - WHAT WOULD IT LOOK LIKE

AND HOW WOULD WE GET THERE?

I visualize North Bay a place that we are prospering in jobs that are meaningful, business is thriving and our streets are safe. Our young people would actually look forward to a good life and hopes of a great career in their own community. Another important aspect of a community that is thriving, are healthy people who can lead meaningful lives. By healthy I refer to each person's optimal health.

We would prioritize spending in areas that strengthen public services, and consistently work at accessing funds to support and maintain our infrastructure. Attracting reliable employers who are interested in investing long term in our community and are willing to provide meaningful employment. We would prioritize public input by providing opportunities for discussion and debate. We would look to the experts in their field to provide feedback around programs and services requiring assistance in serving the public and struggling with funding.

Working together with all community stakeholders is the key to success. We need to care for our vulnerable and look at root causes of poverty and homelessness. I believe if we resolve some of these issues, we are well on our way to a healthy and prosperous North Bay.

Thank you for taking the time to read my response to your questions. I quite enjoyed writing this.

Sincerely,

Suzanne McIntyre
