

*My North Bay is a safe, clean city ... a city with well-maintained roads and infrastructure, clean water and clean air. Our schools teach skills to our youth that will qualify them for the good jobs that are readily available here. Our youth who grow up here have an opportunity to stay here.*

*My North Bay has a responsible local government who listens to and respects its citizens. A local government that does prudent planning before embarking on large projects. A local government that understands that our citizens are not "the bank" and that sometimes hard financial decisions must be made at budget time, just like our families and small businesses do.*

*My North Bay embraces the future by fostering the development of cutting edge industries in mining technology, computer technology, and aerospace. It does this by continuing the development of strategically located industrial land, marketing and creating synergy with our educational institutions.*

*My North Bay welcomes growth and development. It doesn't smother entrepreneurs with taxes and fees which kill growth. It welcomes seniors and those who are new to Canada.*

*My North Bay is not just a dream. Beautiful surroundings, lakes and many big-city amenities ... North Bay has assets that are the envy of other cities. With the right leadership and with the help of our citizens, My North Bay could become reality.*

Sincerely,

James Savard
